## Professional Summary

Full Stack and AI/LLM Engineer who ships scalable, production-ready systems, from React/Next.js frontends to Node.js/TypeScript backends and Dockers-containerized AI agents on AWS. Recently completed a MERN Stack internship at TechnomancerAI (May-Oct 2026) and delivered freelance-style projects end to end. Proven results: 40% fewer API calls, 45% higher throughput, 60% fewer sync errors. Top 15% globally on LeetCode (500+ problems). Open to Full Stack, MERN, Frontend, Backend, and AI/LLM Engineer roles (remote, hybrid, or on-site).

## Technical Skills

**Languages:** JavaScript (ES6+), TypeScript, Java, HTML5, CSS3
**Frontend:** React.js, Next.js, Redux, Context API, TanStack Query, Tailwind CSS
**Backend:** Node.js, Express.js, REST API Design, WebSockets (Socket.IO)
**AI/LLM Engineering:** LLM APIs (OpenAI, Claude), Prompt Engineering, AI Agent Orchestration, Docker-based Sandboxing, RAG Fundamentals
**Databases & Caching:** MongoDB, PostgreSQL, SQL, Redis
**Cloud & Deployment:** AWS (EC2, S3), Docker, Cloudinary, Nginx
**CI/CD & DevOps:** GitHub Actions, Git, CI/CD Pipelines, Agile Development
**Tools:** Postman, VS Code, GitHub, Docker Desktop, Cloudinary Console
**Architecture & Concepts:** Microservices, REST API Design, Authentication & Authorization, RBAC, Performance Optimization, Scalable System Design

## Experience

**MERN Stack Intern** *May 2026 – Aug 2026*
*TechnomancerAI* *Remote (Based in Indore, MP — open to on-site/hybrid)*

- Delivered 10+ responsive UI components and 3 full feature pages using React.js, TypeScript, and Tailwind CSS — directly improving UI consistency and reducing frontend rework across 2 production releases
- Built and integrated 8+ RESTful API endpoints with Node.js and Express.js, cutting average API response time by ~20% through query optimization and Redis caching
- Implemented state management across 5+ modules using Redux and Context API, reducing state-related bugs by ~30% and improving component reusability
- Resolved 15+ bugs and shipped enhancements across 3 concurrent projects in Agile sprints, consistently meeting deadlines and improving overall team delivery velocity

## Projects

**Devin AI Clone (Autonomous AI Software Engineer) |** *Next.js, Node.js, TypeScript, Docker, Redis, LLM APIs* GitHub | Live Demo

- **Problem:** Built an autonomous AI coding agent that plans, writes, tests, and debugs full development tasks end-to-end, cutting manual prompting for routine engineering work.
- **Tech Stack:** Node.js, TypeScript, and LLM APIs power the agent's orchestration/reasoning layer, with Redis for session caching and a Next.js dashboard for live task tracking.
- **How It Works:** Spins up isolated Docker containers per session to safely run and test AI-generated code, supporting 50+ concurrent sandboxes with GitHub integration and live demo previews.

**OpenRouter Clone (AI Gateway) |** *React.js, Node.js, TypeScript, PostgreSQL, LLM APIs* GitHub | Live Demo

- **Problem:** Solved fragmented multi-provider LLM integration with a unified AI gateway, cutting per-provider integration time by an estimated 60% for new users.
- **Tech Stack:** React.js frontend, Node.js/Express.js backend, PostgreSQL for request/usage logging, and a TypeScript SDK wrapping multiple LLM provider APIs.
- **How It Works:** Routes requests through a dynamic provider-abstraction layer supporting zero-downtime model switching, handling 100+ concurrent requests at sub-200ms latency.

**Vision-Space (Real-Time Collaborative Workspace) |** *Next.js, TypeScript, Socket.IO, Express.js, MongoDB* GitHub | Live Demo

- **Problem:** Addressed the lack of real-time multi-user collaboration by letting teams edit the same workspace simultaneously without conflicts or data loss.
- **Tech Stack:** Next.js, TypeScript, Socket.IO for bi-directional sync, Express.js REST APIs, MongoDB for persistence, and session-based RBAC authentication.
- **How It Works:** Uses granular event handling with delta-based state transformation and compressed WebSocket payloads, supporting 5+ simultaneous editors with zero data loss and 2x speed on low-bandwidth links.

## Education

**IES IPS Academy, University of Indore** *2017 – 2021*
Bachelor of Technology in Computer Science and Engineering *CGPA: 7.65 / 10.0 (76.5%)*

## Certifications & Achievements

- LeetCode — Top 15% Global Rank, 500+ Algorithmic Problems Solved (2026) — View Profile
- The Complete JavaScript Course — Udemy Certified (2023) — View Certificate
- Database Management Systems — NPTEL, IIT Kharagpur Certified (2021) — View Certificate
